Rice near every Micro Center.

A Rice Score for all 31 stores, with independent places to eat around each one, at **ricemaps.com/micro-center**. Here is what is on the page and how to use it.

31 stores scored · Independent picks near each · Plan a stop in seconds

1 Find your closest store

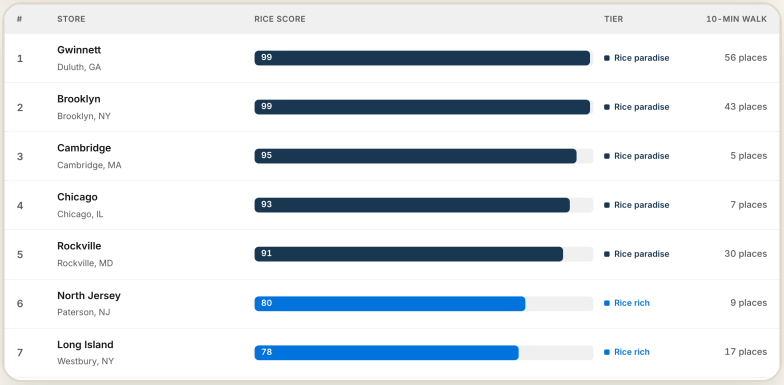

Type an address, city or ZIP at the top of the page, or tap **Use my location**. You get the three closest stores, with distance and Rice Score. Selecting one jumps to its card and fills in the Plan a stop tool.

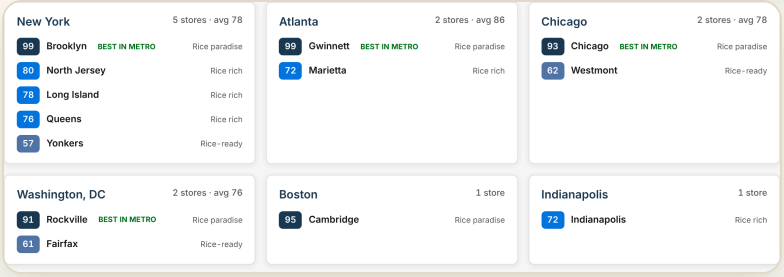

2 The leaderboard

All 31 stores ranked by Rice Score, with bars, tier names and how many places are in a 10-minute walk.

1. Search a store, city or state name.
2. Sort by best score, lowest score, name or state.
3. Select a row to jump to that store's card.

3 By metro area

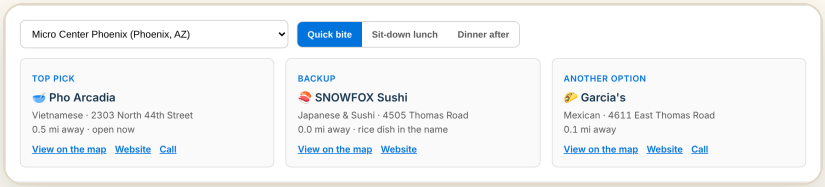

See every store grouped by metro. Where a metro has more than one store, the best Rice Score is marked **BEST IN METRO** and the average is shown.

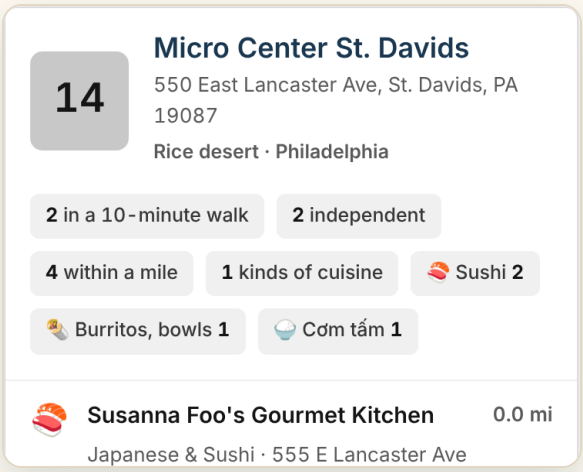

1. Scroll to **By metro area**.
2. Select any store to jump to its card.

4 Plan a stop

Pick a store and the kind of stop. You get three suggestions with distance, open-now status and a website or phone link.

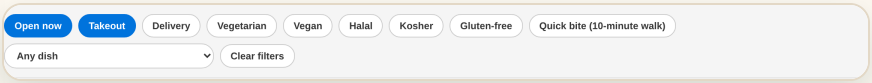

1. **Quick bite**: within a 10-minute walk, favoring takeout and places open now.
2. **Sit-down lunch**: within a mile, favoring complete listings.
3. **Dinner after**: places open at 6:30 PM.

5 Filters and nearby picks

Every store has a card with its score, its stats and independent places nearby, with an **OPEN** tag when OpenStreetMap hours say it is open.

1. Use the chips above the cards: Open now, Takeout, Delivery, Vegetarian, Vegan, Halal, Kosher, Gluten-free, Quick bite or a dish.
2. Stores with little nearby also list places **a short drive away**.

6 Compare up to three stores

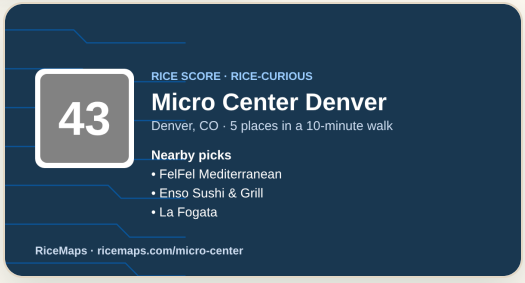

Tap **Compare** on any store card (up to three). A side-by-side table appears with score, walkable places, cuisine variety, top dishes and top picks.

7 Share, embed and print

Every card has what you need to pass it on.

1. **Share** gives a ready-to-send message and a downloadable score image.
2. **Embed** gives a line of code to show that store's picks on your own site.
3. **Print this page** in the footer prints a clean version.
