RiceMaps™

FEATURE GUIDE · FALL 2026

8 new ways to find your rice.

Everything is free, with no sign-up, at **ricemaps.com**. Here is what each feature does and how to use it.

1 Diet filters

Find Halal, Kosher and Gluten-free rice places, next to Vegetarian and Vegan.

1. Open the map and look under the cuisine chips.
2. Tap **Halal**, **Kosher** or **Gluten-free**; tap **More ▾** if you don't see them.
3. Chips only appear where places are tagged, and filters stack with the others.

2 Rice Score

See how rice-rich any address is, scored 0 to 100.

1. Type an address, city or ZIP in the box at the top of the list, then press **Go** (or tap **Use my location**).
2. A **Rice Score** card appears: places within a 10-minute walk, how many are independent and open now.
3. Tap **Share** to send your score.

3 New this month

See places that just appeared on the map.

1. After each monthly refresh, a 🆕 **New** chip shows up when there is something new nearby.
2. Tap it to list only new places; cards carry a New tag.
3. Browse **ricemaps.com/new/** or subscribe to its feed.

4 Find rice by dish

Sushi, biryani, fried rice, paella, jollof and 11 more.

1. Pick a dish from the **Any dish** menu above the chips.
2. Or browse **ricemaps.com/rice/dish/** for every dish by state and city.
3. Matches come from cuisine and name, not a checked menu.

5 Install the app

Use RiceMaps like an app, with places you've viewed working offline.

1. On a phone: browser menu, then **Add to Home Screen**.
2. On a computer: choose **Install the app** in the RiceMaps menu (☰) when it appears.
3. Your saved places stay available without a signal.

6 Road trip

Find rice along a drive, in order.

1. Open 🚗 **Road trip** under the address box.
2. Enter a start and a destination, choose how close to the route, and tap **Plan trip**.
3. Set **Stop about 2 hours in** to see where to pull over. Share the trip with 🔗 **Share**.

7 Rice guides

Short lists to start from.

1. Open **ricemaps.com/guides/** or use **Guides** in the footer.
2. Pick a list, such as independent biryani in your city, or Halal and vegan rice spots.
3. Lists favor complete listings; they are not reviews.

8 Open data and embed

Download every place, or put rice on your own site.

1. Go to **ricemaps.com/open-data/** and download a state as CSV or GeoJSON.
2. Copy the **iframe** line there to show nearby rice places on a blog or local site.
3. Credit © OpenStreetMap contributors and Overture Maps Foundation.

Tip: every filter works together. Try **Independent only** + **Open now** + a dish, then tap 🔗 **Share** to send the exact view to a friend. **Rice heat** and **Pins** change how the map looks.
